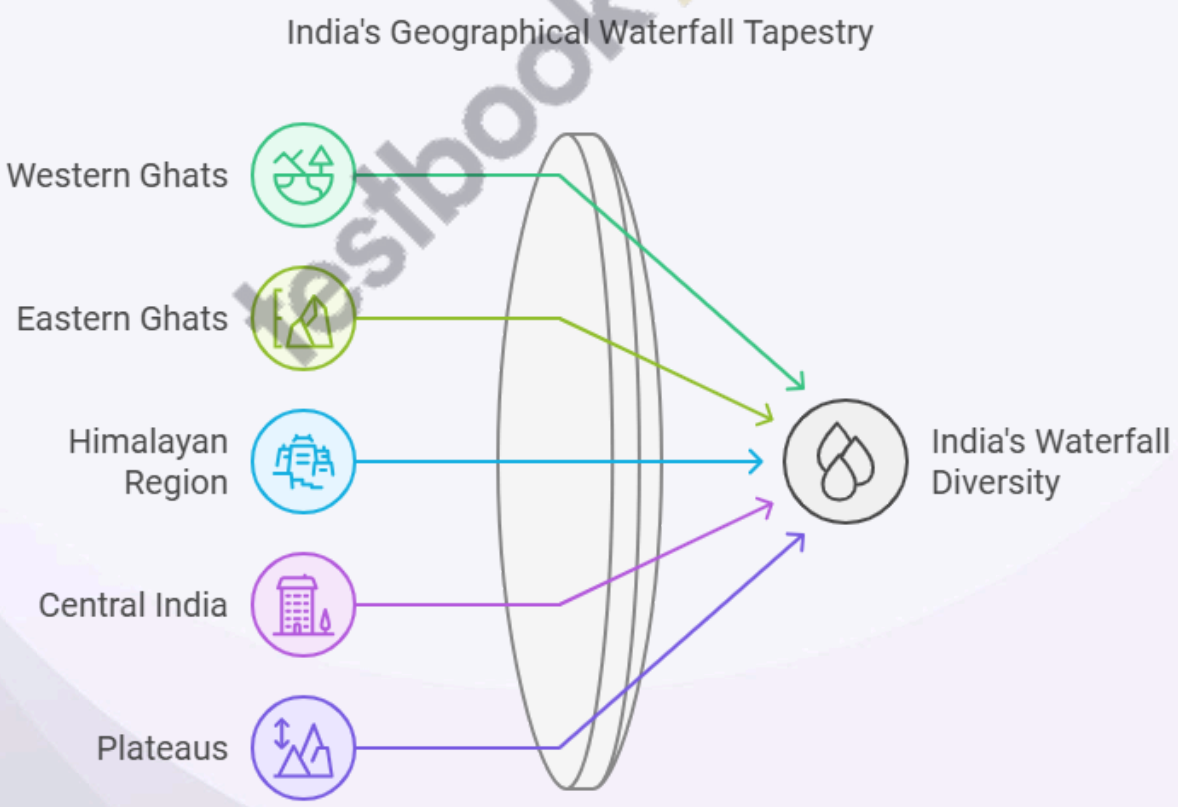
Waterfalls In India

Waterfalls In India

Waterfalls are one of the most mesmerizing natural wonders found across the world, and India, with its diverse topography, is home to many stunning waterfalls. From the hills and mountains in the north to the plateau and forests in the south, waterfalls in India create picturesque landscapes and are often popular tourist destinations. These cascading waters are not only a visual delight but also play significant roles in local ecosystems, providing water for agriculture, drinking, and recreational activities.

India's waterfalls vary in height, size, and the rivers from which they originate. Some are located in the deep forests, offering seclusion, while others are easily accessible, attracting a large number of visitors. The waterfalls also vary in terms of geographical features, including tiered, plunge, or segmented waterfalls. Many are linked to local legends and history, further adding to their cultural significance.

India is home to numerous waterfalls scattered across its different states. Here are a few key features:



Geographical Diversity:

- **Significant Waterfalls:**
  - **Dudhsagar Falls (Goa-Karnataka):** One of the tallest waterfalls in India, Dudhsagar is known for its massive water flow during the monsoon season.
  - **Nohkalikai Falls (Meghalaya):** Located in the Khasi Hills, it is the tallest waterfall in India, plunging 1,100 feet.
  - **Athirappilly Falls (Kerala):** Often called the "Niagara of India," it is Kerala's largest waterfall and a popular tourist spot.
- **Highest Waterfall**
  - **Waterfall: Kunchikal Falls**
  - River: Varahi River
  - Fact: Located in Karnataka, Kunchikal Falls has a height of 455 meters (1,493 feet).
- **Smallest Waterfall**
  - **Waterfall: Palaruvi Falls**
  - River: Kallada River
  - Fact: Located in Kerala, Palaruvi Falls is about 91 meters (299 feet) tall, making it relatively small compared to others in India.
- **Largest Volume of Water**
  - **Waterfall: Jog Falls**
  - River: Sharavathi River
  - Fact: Located in Karnataka, it is a segmented waterfall with a height of 253 meters (830 feet).

Waterfalls List

Waterfall	Location	River
